SECTION 6: EXECUTIVE SUMMARY DATA

 ANALYSIS SUMMARY:

   Analysis Date: 2025-11-12
   Objective: Determine optimal scale and location for ₦1B annual
profit
   States Analyzed: 3
   Data Quality Note: Edo: ACTUAL (Okomu). Cross River & Ondo: PRO
XY (estimates)
   Recommended State: Edo
   Recommended Area ha: 351.6174402250352
   Recommended Investment Naira: 939592123.7693391
   Profit per ha Edo: 2844000.0
   ROI percent annual: 106.42915949404983
   Payback Period years: 7
   Key Risk: Cross River and Ondo estimates may vary ±20%
   Confidence Level: HIGH for Edo, MEDIUM for alternatives
   Primary Data Source: Okomu Oil Palm PLC 2024 Audited Annual Rep
ort
